# Delays are Down from FY2000 Highs

*NAS-wide Delays are Still Below 2000 Levels*

## Operations & Delays at OEP Airports

(Relative to 2000 by Fiscal Year)

- Operations were 3.6% lower in FY2005 than in FY2000
- Delays were 2.6% lower in FY2005 than in FY2000
- Delays have increased from their FY2002 low

# Updated Outlook for Future System Performance

# **System Performance Modeling Update**

## ***Results Reflecting Updated Information***

---

- **Modeled capacity reflects OEP v8.0**
- **Modeled base demand reflects March 2006 schedule**
- **Modeled future demand reflects 2005 Terminal Area Forecast (TAF) (released February 2006)**
- **Future results include ranges of expected 2015 performance (for National Airspace System (NAS) and individual airports)**

## Forecast Changes

*Difference Between 2004 and 2005 TAF in 2015*

<b>Airport</b>	<b>TAF 2004</b>	<b>TAF 2005</b>	<b>% Change</b>
<b>ATL</b>	1,279,975	1,140,615	<b>-11%</b>
<b>BWI</b>	448,306	401,127	<b>-11%</b>
<b>CVG</b>	699,692	509,511	<b>-27%</b>
<b>DTW</b>	754,909	671,847	<b>-11%</b>
<b>IAD</b>	923,001	647,107	<b>-30%</b>
<b>LAS</b>	717,257	861,482	<b>20%</b>
<b>PIT</b>	319,956	284,571	<b>-11%</b>
<b>SLC</b>	600,703	513,754	<b>-14%</b>

Note: 2005 TAF as of March 20, 2006

8 2004 TAF as of March 10, 2005

## Summary

---

- **OEP improvements are needed to keep the system operating with acceptable levels of delay**
  - **Planned OEP improvements are expected to keep delays about the same in 2015 as they were in 2000 (could range from 11 to 18 minutes)**
- **Five airports (EWR, FLL, LAS, PHL, and TPA) are expected to have high delays in 2015 even if demand does not grow as quickly as expected**
- **Effective capacity has increased by about 13% since 2000, and will grow to 30% by 2013**
- **Efforts must continue to be made to implement improvements that will improve system performance**
  - **Enable improved performance in Instrument Meteorological Conditions (IMC)**
  - **Relieve delays at heavily congested airports**
